

MS-New frontiers in regularized damage modeling

Anil Misra (Kansas University, USA), Zdenek Bazant (Northwestern University, USA), Luca Placidi (Università Internazionale Telematica UNINETTUNO, Italy), Emilio Barchiesi (Ecole Nationale d'Ingenieurs de Brest, France)

The purpose of this mini symposium is to discuss the new developments in damage mechanics from both modeling and experimental viewpoints. The topics include regularization, load-path effects, crack-parallel stress effects, and experiments for verification or measuring new damage phenomena.
