

MS Design of multi-scale materials, inverse solid modeling, and simulation of advanced manufacturing and sensing processes

M.Erden Yildizdag and Ahmet Ergin (Istanbul Technical University), Adnan Kefal (Sabanci University)

This mini symposium focuses on recent developments in design and modeling of new advanced multi-scale materials. Also, we aim to highlight the latest advancements in additive manufacturing techniques and their process simulations, and sensing applications in smart monitoring systems of multi-scale materials.
